

unitedstreaming & SMART Whiteboards

Inserting *unitedstreaming* Images into Notebook Software

Inserting Images in Notebook 9.3 or 9.5

1. Identify digital image(s) from *unitedstreaming* and download to local computer.
2. Open SMART Notebook software to create new project or open an existing project. All images for this project must be in the “Attachments” section.
3. Click, hold, and drag downloaded image(s) into the “Attachments” section of Notebook.
4. From the Attachment section, click and hold on the image you want to insert then drag it on to the page.

Use drop down menu to delete image or link to video

5. The image will appear on the page, you can then move it to the exact location you want it placed.
